

A SMARTER WAY TO DRIVE.

As part of the U.S. Environmental Protection Agency's SmartWay® Transport Partnership, Mack® offers a specially selected set of components for Pinnacle™ Sleepers that are proven to reduce fuel consumption and lower emissions of greenhouse gases.

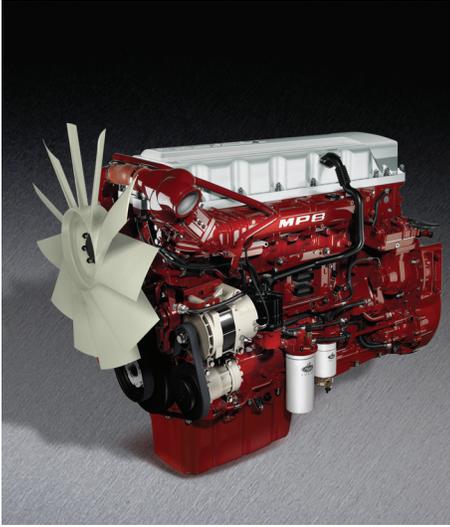

Components include:

- Full Roof Fairings
- Cab Side Extenders
- Aerodynamic Front Bumper
- Fuel Tank Fairings
- Low Rolling Resistance Tires
- Idle-Free™ “Key-Off” HVAC System

Pinnacle tractors built with these advanced components meet the EPA's environmental standards for excellence and can be designated as certified SmartWay tractors.

SMARTWAY® — WHAT IT TAKES TO BE A SMARTWAY-CERTIFIED MACK®

The US'07-certified, Mack® MP™ Engine Series delivers unprecedented fuel efficiency with very low emissions without sacrificing our legendary reputation for reliable, high-horsepower and superior low-end torque engines.

It features a sleek design, inside and out. On the inside, drivers have a comfortable and efficient working and resting environment. A spacious 70" high-rise that offers the latest creature comforts, from full-sized mattresses to domed lighting.

On the outside, the smooth lines of the exterior guide airflow over and around the sleeper, thanks to the full-roof fairings and side extenders that help improve fuel economy by as much as 15 percent.

Fuel-tank fairings work with the bumper to keep air flowing smoothly along the length of the tractor. The bumper and chassis fairings also boost fuel economy.

Mack's aerodynamically designed front bumper doesn't just look good, it also moves air smoothly around and under the front of the truck.

The mirrors combine a wide field of view for safety, yet their aerodynamic design minimizes drag for better fuel economy.

One important way to improve fuel economy and reduce emissions is to give drivers the ability to enjoy a comfortable truck without wasteful idling during rest periods. That's why Mack incorporates the Idle Free™ "Key-Off" HVAC system that supplies electrical power for amenities. This saves fuel, reduces engine wear and cuts emissions for a cleaner environment.

To order your SmartWay-certified Mack Pinnacle™, contact your local Mack dealer today. For more information on the SmartWay Program, visit www.epa.gov/smartway or www.macktrucks.com.
